

**COMO**  
WELLNESS WATER

# COMO-R1000

HUGE FLOW TANKLESS  
RO SYSTEM

**1000GPD**

Huge Flow No Waiting

**4 - Stage Filtration**

To Get Pure H<sub>2</sub>O

**2 Compact Filters**

Efficient, Cost-saving

**Fresh Water**

No Water Staying Overnight

**3:1 Waste Ratio**

3 Cup Pure Water to  
1 Cup Waste Water

**Smart Faucet**

Digital screen with  
TDS Monitor

# 1000G High Flow

There is No Tank Limiting its Performance

**3.2 L / Min**      **3s for 150ml**

Produce Rate

Fresh Water

Tea

## MULTI-STAGE PCB FILTER

Effectively remove the rust, insect,  
sediment, suspended, substance  
remanent chlorine, Thms, peculiar smell

**06-12** Months

## RO FILTER

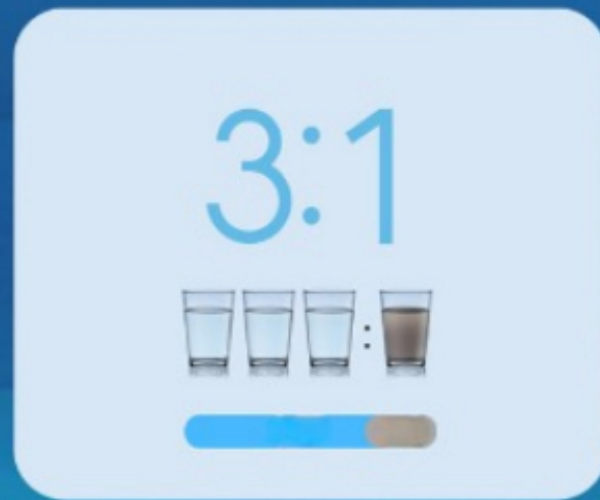

Effectively refuse the remanent  
pesticide, heavy metal, bacterial, virus,  
Mineral Salt

**24-36** Months

# Efficient 3:1 Waste Ratio

Save Your Water Bill

## Fresh Water All The Time

After stopping using water for a period of time, the system enters the automatic flushing mode (there will be sound and vibration), and the filtered pure water returns to the RO membrane to rinse the RO membrane and replace the accumulated concentrated water in the filter element, preventing the concentrated water from going through the membrane. Significantly reduce the TDS value of the first cup of water, improves the water quality and taste of the next water

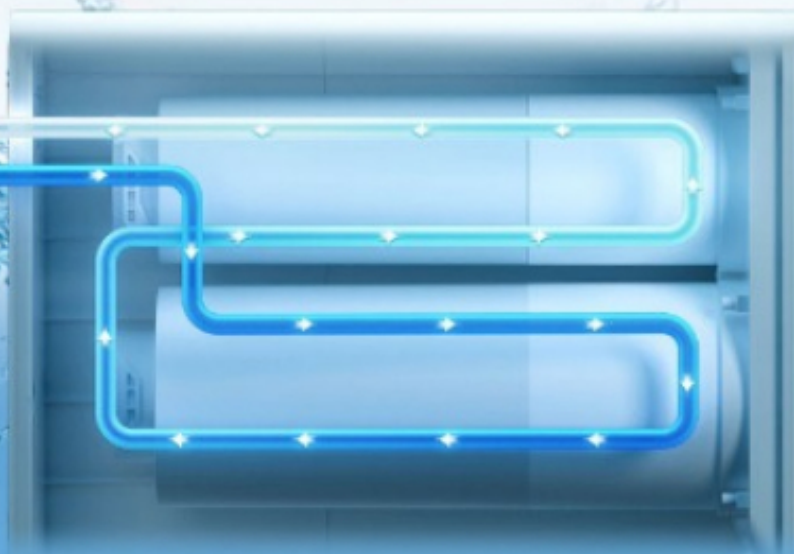

Improve  
Water Quality

Prevent Secondary  
Pollution

Safe For Baby

## Noise Cancellation Design

Quiet Motor You Will not Notice

## Smart Faucet
