

WRH Clack Vertical Twin Tank Whole House Water Conditioner

WRH TWIN TANK SYSTEMS PROVIDE:

- More efficient water to reduce operating and maintenance cost of household water-using appliances, saving you money
- Designed to effectively remove the hardness, chlorine, VOC, taste and odour from water.
- Reduce wear and tear and maintenance requirements on water appliances
- Softer laundry and reduced detergent usage
- Soaps and shampoos have richer lather
- Spotless dishes, glassware, tile & faucets lather and rinse cleaner
- Odor-free, great tasting water
- Space-Saving
- Made-in-Canada

SPECIFICATIONS

- Peak flow 21 GPM, max backwash flow 17 GPM with meter and bypass installed
- Built in backup battery allows backwash regeneration when power outage.
- Adjustable regeneration time and date
- Downflow regeneration
- 5 adjustable regeneration cycles
- Available Inlet / Outlet: 1" or 3/4"
- Power Input: 100~240v AC
- Power Output: DC 12V / 0.6A

UNIQUE FEATURES

- Two tank carbon system keeps media beds separate, allowing for more carbon contact for improved chlorine, chloramines and organic removal
- Carbon can be replaced without replacing the resin bed
- Same benefit as separate systems but with cost of only one control valve
- Salt-efficient Down Flow Regeneration
