

FLUORIDE REDUCTION

FLUORIDE REDUCTION

PRO SERIES, SINGLE BED, DROP-IN CARTRIDGE

Fluoride can occur in drinking water naturally as a result of the geological composition of soils and bedrock. The EPA has set the level of protection for fluoride at 4.0 mg/L or 4.0 ppm, to prevent potential health risk.

The Water Doctor Fluoride Reduction Cartridge is designed to reduce fluoride, radioactive heavy metals, lead, and chlorine. In some parts of the country, there are high levels of fluoride that occur naturally, and fluoride is also added to most municipal water supplies.
