AIO3-AI1000

Ozone For AIO Iron & Sulfur Filter

The Solution for Disinfection and Oxidation

THESE OZONE SYSTEMS PROVIDE:

- **100% Compatible:** Specifically designed to work seamlessly with all Iron & Sulfur AIO Valves in the market.
- **Instant Iron & Manganese Removal:** It quickly turns "invisible" dissolved metals into solid particles so your filter can catch them easily. No more yellow or black stains on your sinks and laundry! **It can treat up to 15 ppm Iron.**
- **Sulfur Smells:** It instantly destroys the "rotten egg" sulfur smell, leaving your water smelling fresh and clean. **Remove 99.99% Sulfur.**
- **Natural Sterilization:** Ozone is a powerful, natural disinfectant. It kills bacteria and viruses on contact without using any harsh chemicals like bleach or chlorine, **20 times faster than chlorine.**
- **Keep Your Filter Cleaner, Longer:** It prevents slimy "iron bacteria" from growing inside your filter tank. This means your system works better and lasts years longer.
- **Crystal Clear Water:** It doesn't just filter—it polishes. It removes the tea-like tint from well water, making it look as clear as bottled water.

**NO Relay Connection Required.
Compatible for all AIO Filter**

SPECIFICATIONS

- **Oxidation Power:** 3 levels 200 / 800 / 1000 mg/h adjustable ozone output for rapid disinfection.
- **Energy Efficient:** Ultra-low 13W power consumption.
- **Plug & Play Voltage:** Safe 110V AC operation (American Power Standard).
- **Easy-Installation & Ultra-Lightweight:** 2 kg Net Weight for easy mounting.
- **Extended Durability:** Engineered for 10,000 to 15,000 hours of service.

WRH AIO3-AI1000 OZONE

PRODUCT CHARACTERISTICS

- **Intelligent Auto Start/Stop:** Equipped with a high-sensitivity flow sensor. The system generates ozone water instantly when the tap is turned on and stops automatically when closed—no manual operation required.
- **No Relay Connection Needed.**
- **High-Stability Ozone Output:** Delivers a consistent 300mg/h ozone concentration, ensuring deep sterilization and effective oxidation of dissolved iron and manganese.
- **Food-Grade Safety:** Features a premium 304 stainless steel ozone faucet and food-grade silicone tubing, ensuring the output water remains pure and free from plastic contaminants.
- **Smart Time Display:** An intuitive digital interface displays real-time working duration, allowing you to monitor the system's performance at a glance.
- **Industrial-Grade Durability:** Built with high-quality components designed for a service life of 10,000–15,000 hours.

⚠ CAUTION: Media Incompatibility

DO NOT use Ozone (O₃) with Birm® media. Ozone is a strong oxidant that will permanently damage and strip the catalytic coating off Birm® media, leading to total system failure.
